SUMMARY

Enthusiastic full-stack developer skilled in building production-grade MERN applications, RESTful APIs, and cloud services. Experienced across the full development lifecycle — from database design and backend logic to responsive front-end interfaces and CI/CD deployment.

EXPERIENCE

Full-Stack Intern

[Techno Comat](#) · May 2025 – Jun 2025

- Developed REST APIs with JWT auth and role-based access control in a live production environment.
- Built login/signup flows and user management features using React.js, Django, PHP, and PostgreSQL.
- Collaborated on full-stack features across the Django + React.js stack following API best practices.
- Optimised database queries and access controls — improving response times and data integrity.

Figma Designer

[SOFT \(Service at Your Fingertips\)](#) | Remote, USA · May 2026

- Designed end-to-end UI/UX for a service booking and on-demand mobile application, covering all requested functionalities from wireframes to high-fidelity prototypes in Figma
- Delivered complete app screens including user onboarding, service discovery, booking flow, and provider management interfaces
